

Modeling Guru Content Posting Policy

Please Note:

This is an official government resource for persons interested in NASA, scientific modeling and high-performance computing. By participating on this government resource you agree to the following rules:

Do not give out your password to any other user and do not allow other users to use your account for posting. You are responsible for the postings that originate from your account.

Scientific and Technical Information (STI) Content

NASA users are reminded to follow the NASA policy for the release of STI data ([NPR 2200.2B](#)) and to adhere to the guidance for following NF 1676.

Prohibited Content

Do not post prohibited or inappropriate content. The following types of materials are considered prohibited and inappropriate for this forum. Any violation of these rules will cause the violating post to be removed and may result in a permanent banning of the user and be reported as an incident.

Registered users may report inappropriate content using the "Report Abuse" link to the right of each thread, or the small "Abuse" link at the bottom of each posted reply.

Inappropriate personal opinions or content

- Personal or private information
- Irrelevant content
- Political or commercial content
